DALLAS GLASS TEMPERING FACTORY W.L.L
The Innovative Glazing Technology

Spacer Bending Machine

'Lisec' from Austria has also provided us with advanced technology and high quality spacer bending with shapes and circles capable of fabricating frames with precise and perfect bent corners.

Beveling & Polishing

For Straight Line Beveling & Polishing DG uses machines supplied by 'Bavelloni' from Italy, also providing with facilities of step beveling for Double and Triple Beveling as well as 45 degree mitering.

Double Glazing Line – 'Lisec'

from Austria is a world leader in research and development in the manufacture Double glazed lines, they have supplied us with a completely automatic process for washing, double glazing and pressing glass with advanced technology.

KATHARA CHILDREN'S MALL

LISEC – CUTTING LINE –BSK-37/26

from Austria provide DG with a flat glass cutting line equipped with automatic transport and positioning with fully automatic computerized cutting, providing precise glass cutting with accuracy and perfect sizes, having consistent quality and high processing capacity. Glass sizes maximum to cut 3700 x 2600mm and capable to cut shape and pattern glasses from 2mm to 19mm thickness.

BLOKKILN - HEAT SOAK TEST

To eliminate Nickel Sulphide Inclusion. Dallas HST is carried out in accordance with EN 14179-1&2. Maximum Glass Size to be HST : 4200 mm x 2500 mm

TAMGLASS HTF SUPER-2448 TEMPERING LINE

From FINLAND is a well known supplier for the best Tempering Line. DG has installed HTF SUPER -2448 with maximum loading length 4800mm and width 2440mm and the glass thickness range to be temper is 3mm to 19mm. The most advanced [ECG+] TOP CONVECTION system, capability to temper LOW-E and all types of medium and high performance glass.

About us

Dallas Glass Tempering Factory W.L.L, IGCC/IGMA certified co, is established to meet the ever increasing demand from the construction industry for processed glass products, commensurate with building programs.

Dallas Glass has maintained its enthusiasm for excellence throughout its service career to emerge, today, as arguably one of the most trusted and efficient service providers in the glass industry.

From our new state of the art 7,400m2 glass processing facility in New Industrial City, Doha, Qatar has proven ability and expertise to offer customers the highest quality, widest range, largest sizes of structural glass yet to be processed in the region.

We begin this century with a clear vision that includes a renewed dedication to our principles. A new set of strategic goals that will make DG, the glass processing factory of choice in the innovative construction industry.

“The innovative Glazing Technology”...
is what DG is all about !

Product Range

- / Reflected glass
- / High performance/ medium performance glass
- / Tempered/ Toughened glass
- / Heat Strengthened Glass
- / Heat Soak Tested Glass
- / Anti reflected Glass
- / Low iron- Crystal Clear Glass
- / Laminated Glass
- / Low- E coated glass
- / Decorative Double Glass with Georgian profile
- / Fire Resistant Glass
- / Bullet Resistant Glass
- / Double Insulated Glass
- / Figured Glass
- / Mirrors
- / Custom Shower Doors & Accessories
- / Frameless Doors & Accessories
- / Automatic Camera Door.
- / Glass Railing Systems
- / Curved Glass
- / Sand Blasted Designed Glass

Besides supplying the above types of glass in various sizes and thickness, DG also Trading stock sheets, glass accessories and fittings.

DG can also source your specific requirements from its partner companies from all over the world.

Production facilities

DG's state-of-the-art technology and modern mechnaries provide our customers with aesthetically advanced glass that fulfills the needs of the designers, and also complies by all quality standards.

Our new factory processing facility with latest and new machinery imported from the best suppliers in the industry is well equipped to satisfy the demands of high-performance glass by offering a wide variety of glass products.

Our Production Facilities and machinery comprise of:

SI. NO	Description	Qty.	Manufacturer	Country of Origine

Automated Sandblasting Machine

Supplied by 'Dynamiki' from Greece a well known supplier for sandblasting machinery, DG has installed the most modern machinery used for decorative, textured and architectural glass, having mass production capabilities. For High Quality Performance DG is applying Aluminium Oxide instead of Sand.

OUR MISSION

Our mission is to anticipate and meet the needs of our clients in commercial, industrial and residential sectors by applying our expertise in architectural glass and structural glazing. Our primary goal is to provide quality and innovative products to end users, keeping in view the seven core values which are:

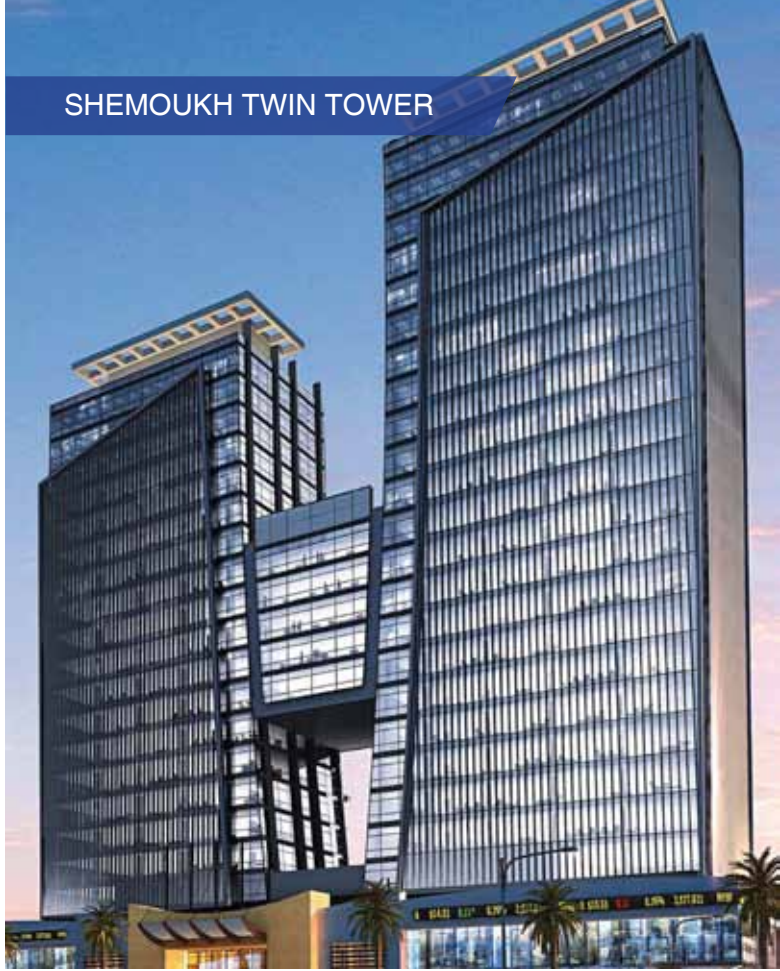

- Safety
- Security
- Reliability
- Technology
- Life Style
- Affordability
- Aesthetics

To achieve our aim, we utilize innovative engineering techniques and systematically manage our projects from conception to development and execution. This together with company values, team integrity, and strong project management skills, leads to a timely completion of quality projects whose structural soundness, fitness for purpose, aesthetics, economy of construction, and harmony with the overall building plan, allow us to exceed client satisfaction.

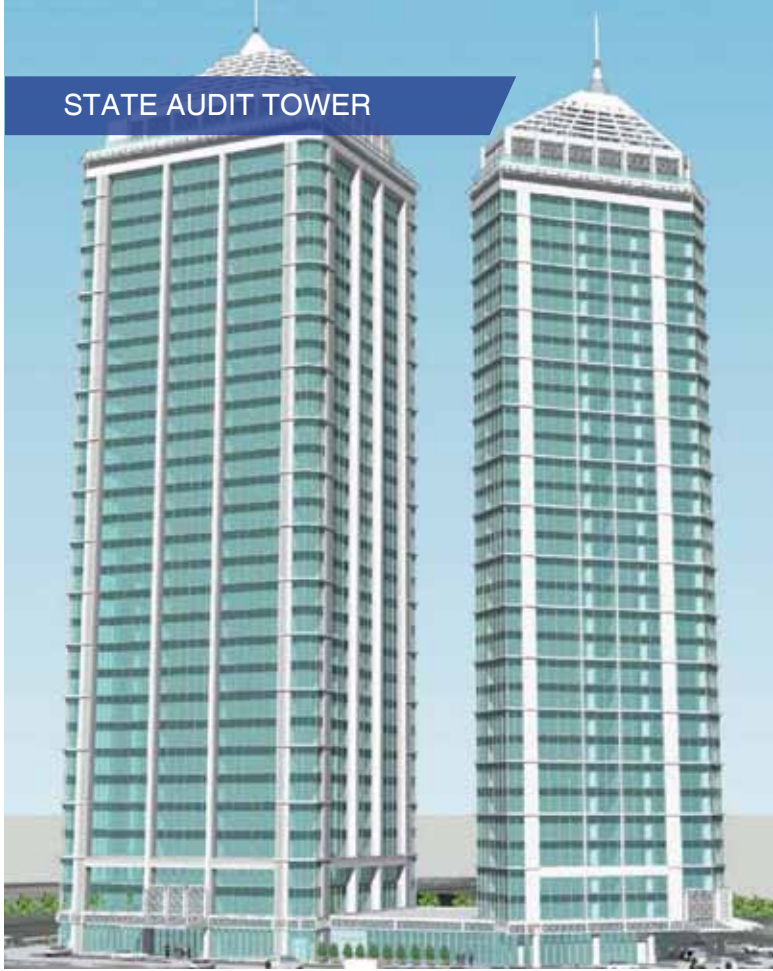

Our philosophy is moulded on the enduring values of transparency, trust, quality, technical mastery and result orientation. Each member of our team is devoted to better serve clients through continual improvement, knowledge, growth and performance excellence. We value teamwork; collaboration and hence build an uphold long-term relationships with our clients and suppliers.
